Re: Docket # 07-16

Dear Secretary Dortch,

The proposal referenced above offers the promise of broadband internet access to all Americans, regardless of location. I'm concerned that many people now live in areas where broadband access is not an available service. This means families are not connected and are being left behind in the information age.

Now there is a chance to provide many Americans a viable link to the information and communications tools the internet offers. If the proposal by M2Z Networks is accepted, free, fast and family-friendly broadband access will be a reality for millions. It will provide parents the opportunity to learn with, and help, their children. Also, with the sophisticated filter proposed, parents will not have to worry about the internet being safe.

I'm writing to ask that you support this proposal and bring free, fast and family-friendly broadband to Americans everywhere. As a country, we should do more to connect to the best technology available.

Sincerely,

Dan Mansell

Re: Docket #07-16

Dear Secretary Dortch,

In order to keep up with other countries, the U.S. needs to expand broadband access. There nearly 120 million adults in this country that are not broadband connected, and the U.S. ranks 21st globally. Offering more broadband is a solution on the horizon.

I'm glad to learn that a plan is being considered by the FCC to allow a company to provide free, fast and family-friendly broadband access nationwide. This would put any American with a modem on-line at high speed. It would also make it more affordable for school and towns to use broadband, and that could greatly increase the resources available to schools and local governments.

More Americans, especially children, will benefit from endless information and communication available on-line. I hope you will support the plan to allow free broadband access.

Dear Madame Secretary,

In today's fast-paced and online world, businesses not connected to the Internet are having more and more difficulty "making it." Small businesses make up 99 percent of America's businesses and they represent so much of the American Dream other nations and citizens long for. It saddens me, however, to see that America only ranks 21st in the International Telecommunications Union's global ranking in broadband penetration. How can this be?

I find it disheartening to see that many small businesses simply cannot afford internet access. Some small businesses have to stretch themselves so thin in order to have internet access, that then they cannot focus their dollars in more effective areas. Further, some small businesses cannot even receive internet access because of their rural location.

There is a light at the end of the tunnel for these small businesses, however. That light is the M2Z proposal to provide fast, free wireless broadband internet service to all Americans. This window would give small businesses the support and connectivity needed in order to turn into more than the rural small business and into the leading business in its market.

Americans shouldn't only have to dream the American Dream. Entrepreneurs should not have to get hit down and burdened by one more cost that could make the difference. Give Americans the chance to face their dreams and to get connected. I urge you to support the above mentioned proposal as it is seen in Docket # 07-16.

Give us our American dream.

Sincerely,

Laura Harvey

Re: Docket # 07-16, Providing fast, free, family-friendly wireless broadband internet service

Dear Secretary Dortch,

The internet is a valuable resource in daily American life. Businesses, home-schools, governments and individual families use the internet every day. Nearly 80% of college students report using the internet in their studies. Yet this valuable resource is not a viable option for millions, until now.

The FCC should approve of the plan to allow M2Z Networks to provide free, fast broadband access nationwide. This network would give high speed internet to individuals and businesses that can strengthen our education system and economy. Freedom to use the internet broadens the opportunities available to everyone.

This country relies on the internet to communicate, work and play, and this should include everyone. I urge you to approve of the plan and thank you for your consideration.

Sincerely,

Re: M2Z Proposal in Docket # 07-16

Dear Secretary Dortch,

In communities throughout this country, families are unable to take advantage of the internet. Only 41 percent of students in households that make less than \$20,000 a year use the internet. For some, it's an issue of access and for others the reason is purely economic. However, all children should be given the opportunity to compete on the same level if at all possible.

With the help of the FCC, children will be given a better chance at using the internet for learning and playing. A current proposal being considered would give free broadband nationwide just by having a modem. This means in more areas of the country, homes, schools and community centers, will be able to go on-line.

I encourage the approval of this proposal to expand access to the internet to students in all areas and from all economic backgrounds. Thank you for your time.

Sincerely,

Washington, DC 20554

Dear Secretary Dortch,

I'm writing to show support for the Docket # 07-16 proposal to provide free, fast broadband access to all Americans, especially because of the benefits it will bring to businesses. This proposal will make e-commerce a reality for many, connecting more businesses to the advantages of marketing on-line

Especially in rural areas, free broadband will open doors for businessmen who may not have any reliable access at this time. It will help the country's economy to have businesses working to be more competitive, run their day to day business efficiently, and have the benefit of more connectivity to other businesses in their market. All of these are more likely with greater access.

I hope the FCC will approve the proposal to provide free, fast broadband access. I think of the positive outcomes for those who don't currently have broadband options and the impact it will have on entire communities. Thank you for your consideration.

Re: **Docket # 07-16**

Dear Secretary Dortch,

Using the internet has become an important teaching tool for families and educators, and broadband access provides even more tools and information. I'm concerned that, for many, broadband access is not an option. Less than half of the students who live in households that make less than \$20,000 use the internet.

There is a solution being proposed to the FCC by M2Z Networks that would bring broadband access to all Americans. If approved, it would be easier for families to access on-line learning resources, and parents can be more involved in their child's education. Also, educators would have more access and less expense in finding teaching tools on-line.

Free, fast, and safe broadband access is needed. America cannot afford to fall behind technologically to many countries where broadband is already widely available.

Sincerely,

GOOLSBY LAW FIRM, PLLC
